

## Step 1- Back Piece

Face Piece away from you so that the two steps face to the outside of the tank

## Step 2- Left Hand Piece

Find 2<sup>nd</sup> piece with pin inserts on one side, and insert holes on the other. Attach to back piece by inserting pins into holes in the back piece.

## Step 3- Right Hand Piece

Find 3<sup>rd</sup> piece with pin inserts on one side, and insert holes on the other. Attach to back piece by inserting pins into holes in the back piece.

## Step 4- Front Piece

Find the front piece. (It's the only piece with pins on both sides) Insert into left and right piece holes.

## Step 5- First Cage

Find 1<sup>st</sup> cage piece (it has insert holes at top) Insert square legs into square holes on top of left hand piece.

## Step 6- Second Cage

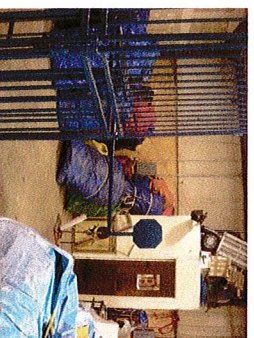

Find 2<sup>nd</sup> cage piece (it has one pin on top) Insert square legs into square holes on top of front piece and the pin into the hole on cage #1.

## Step 7- Attaching the seat

On some of our models, the seat is not welded on to the back piece, you will need to attach the seat by inserting the square pegs into the top of the back piece.

## Step 8- Attaching the Target

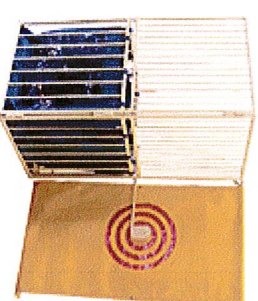

Insert the target by finding the square peg on the side of the seat. Insert the end of the target into that peg, while inserting sliding mount into square hold on left hand side of back piece.

## Step 9- Attaching Backdrop Arm

Find the backdrop arm and insert the square peg into the sliding mount while inserting the pin into the hole on the top of cage #1.

## Step 10- Attaching Vinyl Components

Find the vinyl liner and spread it out inside of the tank with the clear window facing forward. Velcro the straps around tank to hold it in place. Attach the vinyl backdrop by sliding it over the seat cover by sliding it over the seat and attaching the velcro.
